

Agency Priority Goal Action Plan

Maximize Small Business Participation in Government Contracting

Goal Leader:

Barbara E. Carson, Deputy Associate Administrator
Office of Government Contracting and Business Development

Deputy Goal Leader:

David Loines, Director of Government Contracting
Office of Government Contracting and Business Development

Overview

Goal Statement

- By September 30, 2021, maximize the percent of federal contracts by exceeding the 23 percent awarded to small businesses.

Challenge

- For the last six fiscal years, the Federal Government has awarded at least 23 percent of contract dollars to small businesses. However, some agencies do not meet their agency-specific small business contracting goals.

Opportunity

- The SBA has placed special attention to ensure that the statutory goal is not only met but maximized through targeted outreach to federal agencies and promotion of contracting opportunities to small businesses.
- This Agency Priority Goal advances the SBA's mission to maintain and strengthen the nation's economy by enabling the establishment and vitality of small businesses. It aligns with the FY 2018-2022 SBA Strategic Plan Strategic Goal 1 to support small business revenue and job growth through Strategic Objective 1.3 to ensure federal contract and innovation set-aside goals are met and/or exceeded.

Leadership & Implementation Team

Core Team:

- Office of Government Contracting
 - Deputy Associate Administrator
 - Office of Policy, Planning and Liaison, Director (Policy and Data)
 - Office of Business Development, Associate Administrator (8(a) Program)
 - Office of HUBZone Empowerment, Director (HUBZone)
 - Office of Government Contracting, Director (Contracting)
 - Procurement Center Representatives
- Office of Field Operations
 - Business Opportunity Specialists

Goal Structure & Strategies

Implementation Strategy Overview:

- The Federal Government has a statutory 23 percent small business goal and will continue to focus on setting individual agency goals based on data analysis of past performance and potential opportunities.
- The SBA's Procurement Center Representatives (PCRs) focus their advocacy on agencies with substantial small business eligible spending and conduct surveillance reviews of buying activities that have a major impact on meeting the statutory goal or that struggle to meet their goals to provide guidance and best practices.
- The Office of Policy, Planning and Liaison chairs the Small Business Procurement Advisory Council (SBPAC) which includes the Directors of Office of Small and Disadvantaged Business Utilization from all the agencies and provides each agency with their small business goal and monitors performance at each monthly meeting. Agencies also share best practices at SBPAC meetings.

Goal Structure & Strategies

External Factors and Mitigation Strategies:

- Exceeding the Federal contracting goals is dependent on effective coordination between internal and external partners. SBA will emphasize strengthening these core partnerships and optimizing the coordination between partners.
- SBA informs federal agencies of small business contracting requirements and options, but SBA does not decide which contracting options agencies pursue. SBA senior leadership will engage at all levels for each agency to ensure small businesses have access to contracting opportunities. SBA is also conducting a program evaluation to examine the effectiveness of the contracting scorecard in measuring performance, promoting small business procurement opportunities, and on small business contracting goal achievement.
- Consolidations of contracts and other factors may contribute to reduced opportunities for small business. The SBA will conduct training and outreach throughout the year to educate agencies on small business contract opportunities.
- Agencies may not be aware of best practices designed to maximize small business utilization in Federal contracting. At SBPAC meetings, agencies share best practices that were implemented by their agency and that might be implemented by other agencies.

Key Indicators

Summary of Progress – FY 2020 Q1 & Q2

- In FY 2018, the Federal government exceeded the 23% statutory small business prime contracting requirement for the sixth consecutive year. Federal agencies awarded 25.1% of prime contracts to small businesses, resulting in \$120.8 federal contracts awarded to small businesses and supporting or creating 638,000 American Jobs.
- In FY 2018 Quarter 4, the seven agencies with the largest procurement budgets (Big 7) constituted 88% of eligible dollars and all are above goal: DHS, DoD, HHS, GSA, VA, NASA, and DOE (see charts on next slide).
- In FY 2017 and FY 2018, the Federal Government surpassed its Service-Disabled Veteran-owned and Small Disadvantaged goals. However, the Federal Government did not meet its HUBZone and Women-owned goals (see charts on next slide).
- The Federal Government is surpassing its FY 2019 small business utilization target. FY 2019 data is not certified as final until spring FY 2020.

**Official data are not available until the third quarter of the next fiscal year.

FY 2019 official data are not available until the third quarter of FY 2020.

Key Milestones – FY 2020 Q1 & Q2

Data Accuracy and Reliability

- Award of contracts are recorded in the Federal Procurement Data System–Next Generation (FPDS–NG). Data are entered into FPDS–NG by the contracting officer or other acquisition staff, manually or by transmission from contract writing system.
- Responsibility for determining the accuracy, reliability, and quality of data reported in FPDS–NG rests with reporting agencies. However, the SBA routinely reviews FPDS–NG data and provides guidance to agencies to increase data reliability and timeliness. Agencies must attest to data reliability to the Director of Federal Procurement Policy.
- Data are entered into FPDS–NG by import from contract writing applications and manually. It is subject to data entry error; however, logical edits are built into the system to mitigate some data limitations. Additionally, each agency must certify to the data quality in FPDS–NG annually to OMB.
- Data for Procurement Center Representative (PCR) acquisition reviews and subcontracting plan reviews are sourced from the six Office of Government Contracting Area Offices through monthly metric reporting.
- Official data are not available until the third quarter of the next fiscal year.

Additional Information

Contributing Programs

Program Activities:

- Prime Contracting Assistance
- Small Business Size Standards
- Women Small Business-Owned (WOSB) Program
- 8(a) Business Development Program
- HUBZone Program
- Small Business Procurement Advisory Council (SBPAC)

Other Federal Activities:

- Office of Small and Disadvantaged Business Utilization (in each Federal agency). Every federal agency contributes toward the goals. The larger agencies, such as the U.S. Department of Defense, have a major impact on performance because they comprise a large portion of overall spending. The Offices of Small and Disadvantaged Business Utilization in each agency, with the support of senior leaders, must partner with SBA to drive small business consideration.

Stakeholder / Congressional Consultations

The SBA hosts a monthly meeting of the Directors of Office of Small and Disadvantaged Business Utilization to discuss performance goals and to share best practices. The SBA also engages the agencies at every level to stress the importance of maximizing small business contracting. In addition, the SBA consulted with congressional appropriations and authorizing committees.
